

Research Appendix

12713 Cinchring Lane, Austin, TX 78727

June 3, 2026

Research Appendix

Property: 12713 Cinchring Lane, Austin, TX 78727 **Legal Description:** Lot 12, Block M, Scofield Subdivision
Report Date: June 3, 2026 **Assessment Tier:** Tier 1 (Address Only)
Companion Document: Site Intelligence Report **Prepared by:** Noetic AI

1. Research Methodology

This Tier 1 (address-only) assessment was conducted without access to MCP surveyor tools (TCAD, COA GIS, FEMA NFHL, Travis County Clerk, TCEQ). Research relied on feasibility intake data, web research (MLS listings, City of Austin resources), and all 11 Bureau feasibility guides for Austin.

Tools Attempted vs. Available

Tool	Status	Notes
TCAD appraisal_search	NOT AVAIL	Surveyor MCP not provisioned
TCAD appraisal_details	NOT AVAIL	Surveyor MCP not provisioned
COA GIS property_profile	NOT AVAIL	Surveyor MCP not provisioned
COA GIS adjacent_context	NOT AVAIL	Surveyor MCP not provisioned
FEMA flood lookup	NOT AVAIL	Surveyor MCP not provisioned
TCEQ Edwards zone	NOT AVAIL	Surveyor MCP not provisioned
TxDOT roadway lookup	NOT AVAIL	Surveyor MCP not provisioned
County clerk search	NOT AVAIL	Surveyor MCP not provisioned
Census / QOZ lookup	NOT AVAIL	Surveyor MCP not provisioned
Web search	USED	Multiple queries; MLS, COA, LDC sources
Bureau feasibility guides	USED	All 11 disciplines reviewed

2. Source Data

Intake Data (Tier 1)

Address: 12713 Cinchring Lane, Austin, TX
Legal: Lot 12, Block M, Scofield Subdivision, Cabinet 91, Slide 264-265
Proposed: Demo existing; build new duplex (ground-up)
Existing: 1-story brick/wood house, concrete drive, wood fence
Flood Zone: Zone X per FIRM Panel 0115E, dated 6/16/93

Easements (from Intake)

- 5' Public Utility Easement (P.U.E.) and 25' Building Line
- Blanket-type electric easement per Vol. 660, Pg. 968
- Ingress & egress easement for utilities per Vol. 11863, Pg. 1147
- Declarant reserves right to grant/dedicate R.O.W. and easements, not to exceed 10' each side of any lot line per Vol. 11863, Pg. 1147

MLS / Public Record Data

Field	Value
Lot Size	8,054 SF (0.18 acres)
Structure	2,095 SF, 4 bed / 2 bath
Year Built	1993
Stories	1
Construction	Brick and wood
HOA	Scofield Farms ROA, \$125/quarter
ZIP	78727
Source	Redfin MLS #6917720

Community Context

Scofield Farms is located off Parmer Lane and Metric Boulevard in North Austin between I-35 and Mopac. Three sections: Original (east of Metric, north of Parmer), Park at Scofield (east of Metric at Chasewood),

and Withers Way (west of Metric). Pflugerville ISD serves the area. HOA managed by Inframark with an Architectural Control Committee (ACC).

3. Zoning Analysis

Base Zoning Inference

The base zoning was inferred from lot size analysis:

- **SF-2 minimum lot size:** 10,000 SF
- **SF-3 minimum lot size:** 5,750 SF
- **Subject lot:** 8,054 SF

The lot meets SF-3 minimums but not SF-2 minimums, indicating **SF-3** as the most likely base zoning district. The property could be SF-2 with a pre-existing non-conforming lot size if the subdivision was platted under different standards, but this is unlikely given the lot is part of a platted subdivision.

Limitation: This is an inference, not a confirmed zoning designation. GIS confirmation is required.

4. HOME Amendments Analysis

HOME Phase 1 (effective 2024) key provisions:

- Allows duplexes, two-unit, and three-unit on SF-1, SF-2, and SF-3 lots
- Building coverage max 40% for duplex/two-unit/three-unit
- Impervious cover max 45%
- Height per base zoning (35 ft for SF-3; Subchapter F 32-ft restriction applies only to single-family residential use)
- No minimum parking (citywide elimination, Ord. No. 20231102-028, Nov 2023)

HOME Phase 2 (accepted Nov 2024; Site Plan Lite/Infill Plat from June 2025): Lowered small-lot SF minimum to 1,800 SF. Not directly relevant to this duplex project.

Key regulatory finding: A duplex on an SF-3 lot proceeds via building permit only. No site plan, no Subchapter E, no TIA.

5. Dimensional Envelope Calculation

Capacity Table (8,054 SF lot)

Parameter	Calculation	Result
Max GFA (0.40:1 FAR)	8,054 x 0.40	3,222 SF
Max bldg coverage (40%)	8,054 x 0.40	3,222 SF
Max imperv. cover (45%)	8,054 x 0.45	3,624 SF
Available IC for paving	3,624 - 3,222	402 SF (if max footprint)

Two-story design advantage: A two-story duplex with ~1,611 SF footprint achieves 3,222 SF GFA while using only 20% building coverage — well within the 40% limit. This frees 2,013 SF of IC budget for driveways, walkways, and patios. A single-story design maxing out coverage leaves only 402 SF for all other paving.

Estimated Setback Analysis

Using typical Scofield Farms lot geometry (~60 ft wide x 134 ft deep):

- **Front (25 ft):** 134 - 25 = 109 ft depth available
- **Rear (10 ft):** 109 - 10 = 99 ft depth available
- **Sides (5 ft each):** 60 - 10 = 50 ft width available
- **Buildable rectangle:** ~50 ft x 99 ft = ~4,950 SF

Setbacks are **not the binding constraint** — FAR and building coverage (3,222 SF) are the controlling limits.

6. Easement Impact Analysis

5-ft P.U.E.: Standard utility easement. If present on both side lot lines, buildable width reduces to 50 - 10 = 40 ft.

25-ft Building Line: Consistent with SF-3 front setback. No additional constraint beyond what zoning requires.

Blanket Electric Easement (Vol. 660, Pg. 968): Could range from access-only rights (minimal impact) to full construction restriction across the lot (severe impact). Instrument review is essential.

Declarant's 10-ft Reservation (Vol. 11863, Pg. 1147): Worst case: 10 ft each side + 5 ft P.U.E. + 5 ft setback = 20 ft from each side lot line, leaving only 20 ft buildable width on a 60-ft lot. This would make duplex construction extremely challenging.

7. Flood & Environmental Analysis

FIRM Panel Analysis

Panel 0115E, Community No. 480624 (48453C), dated June 16, 1993.

Zone X (unshaded): Areas outside the 0.2% annual chance (500-year) floodplain. Most favorable designation — no floodplain development permit, no FFE requirements, no ASCE 24 compliance needed.

Limitation: FIRM date of 1993 is 33 years old. Travis County has undergone significant FIRM updates. Current panel should be confirmed but the Scofield Farms area is generally upland terrain.

Watershed Inference

Walnut Creek Watershed — property location east of Metric Blvd in North Austin places it within the Walnut Creek system (drains ~43 sq miles from North Austin to Colorado River).

Classification is likely **Suburban** or **Urban** development zone. This affects:

- Cut/fill disclosure (exempt in Urban, required in Suburban)
- Impervious cover limits per watershed
- Water quality control sizing

Edwards Aquifer: Not in recharge or transition zone (north Austin, well north of the boundary).

Barton Springs Zone: Not applicable.

8. Regulatory Pathway Analysis

Site Plan Exemption

Under LDC Chapter 25-5, a site plan is NOT required for single-family or duplex construction on an existing platted lot. This means:

- No Subchapter E (Design Standards) compliance
- No formal completeness check process
- No multi-department review cycle
- Faster timeline through residential building permit
- No TIA or Transportation Assessment
- No PARD parkland dedication (building permit path, not site plan)

The project proceeds through the **Residential Plan Review Division** under:

- LDC Chapter 25-2 (zoning compliance)
- 2024 International Residential Code

- LDC Chapter 25-12 (technical codes)

Compatibility Standards

Post-July 2024 Article 10 (Ord. No. 20240516-004) applies only to sites zoned MF-4 or less restrictive AND within 75 ft of a triggering property (1-3 DU zoned SF-5 or more restrictive).

SF-3 is more restrictive than MF-4. The subject site is **not subject to Compatibility Standards** for its own development. The property IS a potential triggering property for nearby commercial development.

9. Feasibility Guides Referenced

Discipline	Guide	Key Findings
ZLU	Zoning & Land Use	SF-3 likely; duplex permitted under HOME; no overlays
SDUF	Site Dev / Use / Form	No site plan required; Subchapter E N/A
SDE	Subdivision & Dev Eng	Standard residential drainage; WQ may apply if IC > 8,000 SF
EL	Electrical & Utility	Austin Energy service; check overhead clearances
FWP	Floodplain & Waterway	Zone X — no floodplain constraints
EPTP	Erosion, Trees & Plants	Tree survey critical; ESC plan required
TA	Transportation Access	Local street; no TIA; no ROW dedication
WWP	Water & Wastewater	Austin Water; existing service; tap fees apply
Fire	Fire Feasibility	Standard residential; hydrant coverage expected
Park	Parkland Dedication	Likely not triggered (building permit path)

10. Recorded Document References

Document	Reference	Priority	Status
Blanket electric esmt	Vol. 660, Pg. 968	HIGH	Not retrieved — surveyor tools unavailable
Declarant esmt reserve	Vol. 11863, Pg. 1147	HIGH	Not retrieved — surveyor tools unavailable
Subdivision plat	Cab. 91, Sl. 264-265	MED	Not retrieved — surveyor tools unavailable
Declaration of CC&Rs	Unknown instrument	HIGH	Not retrieved — requires HOA or clerk search

11. Confidence Matrix

Data Point	Confidence	Source	Gap
Address / location	HIGH	Intake + MLS	None
Legal description	HIGH	Intake (survey)	None
Lot size	MED-HIGH	MLS data	TCAD confirmation
Base zoning	MEDIUM	Lot size inference	GIS confirmation
Overlay districts	LOW-MED	No indicators found	GIS confirmation
Use permissibility	HIGH	LDC + HOME	Zoning TBD
Dimensional stds	MED-HIGH	LDC 25-2-492	Zoning TBD
Flood zone	MEDIUM	Intake (1993 FIRM)	Current FIRM panel
Watershed	LOW-MED	Geographic inference	GIS confirmation
Easements	MEDIUM	Intake data	Instrument review
Deed restrictions	VERY LOW	Not reviewed	CC&R review
Trees	VERY LOW	No data	Field survey
Utilities	MEDIUM	Existing assumed	AW/AE confirmation
Compatibility	HIGH	LDC Article 10	None
Permit path	HIGH	LDC Ch. 25-5	None

Assessment Tier: This Tier 1 (address-only) research appendix documents the methodology, sources, and analysis behind the companion Site Intelligence Report. A Tier 2 or Tier 3 assessment with TCAD records, COA GIS property profile (168 layers), county clerk document retrieval and transcription, and an RPLS-certified tree survey would resolve all identified data gaps and substantially increase confidence across all categories.
