Executive Summary

The Offering

Colliers is pleased to present a prime development opportunity in the 2-mile Austin ETJ, boasting a 27 acre site without zoning restrictions.

Located adjacent to SH-130 with two access points on Cameron Road, this flood-free site sits amidst a burgeoning industrial and multi-family hub between Pflugerville and Austin in Travis County. With proximity to major developments and key facilities like the Tesla Giga-factory, it offers swift access to amenities, a robust labor pool, and major employers. Coupled with essential utilities, including water and 3-phase electricity, this site presents a compelling opportunity for both local and national developers.

Location Overview | Far Northeast

The Far Northeast Submarket continues to show strong demand, even with the increased trend of speculative development. Net absorption had positive momentum in 2023 which is forecasted to continue into 2024. Recent increases in absorption are attributed primarily to the occupancy of newly completed buildings, notably at Crossroads Logistics and 130 Crossing. Proximity to Samsung’s factory in Taylor and Tesla’s Gigafactory, to the northeast and directly south of the submarket, respectively, have been key factors attracting tenants seeking convenient mobility and accessibility. Coupling this submarkets proximity to large companies with a general demand for warehouse space along the TX-130 corridor makes the Far Northeast one of the most sought-after markets in the Austin area.

Market
Overview

Location Overview

Austin, Texas

Austin is the capital city of Texas. It is the 11th-most populous city in the United States, the fourth-most-populous city in Texas, and the second-most-populous state capital city. According to an article published by the Austin Business Journal, Austin has been the fastest growing major metro (population of at least 1 million) on a percentage basis for nine straight years, from 2010 to 2019. In 2020, Austin’s population grew by 3.43% and in 2021 it grew by 2.3% during the one-year period, making the current population of the Austin MSA 2,352,426 people.

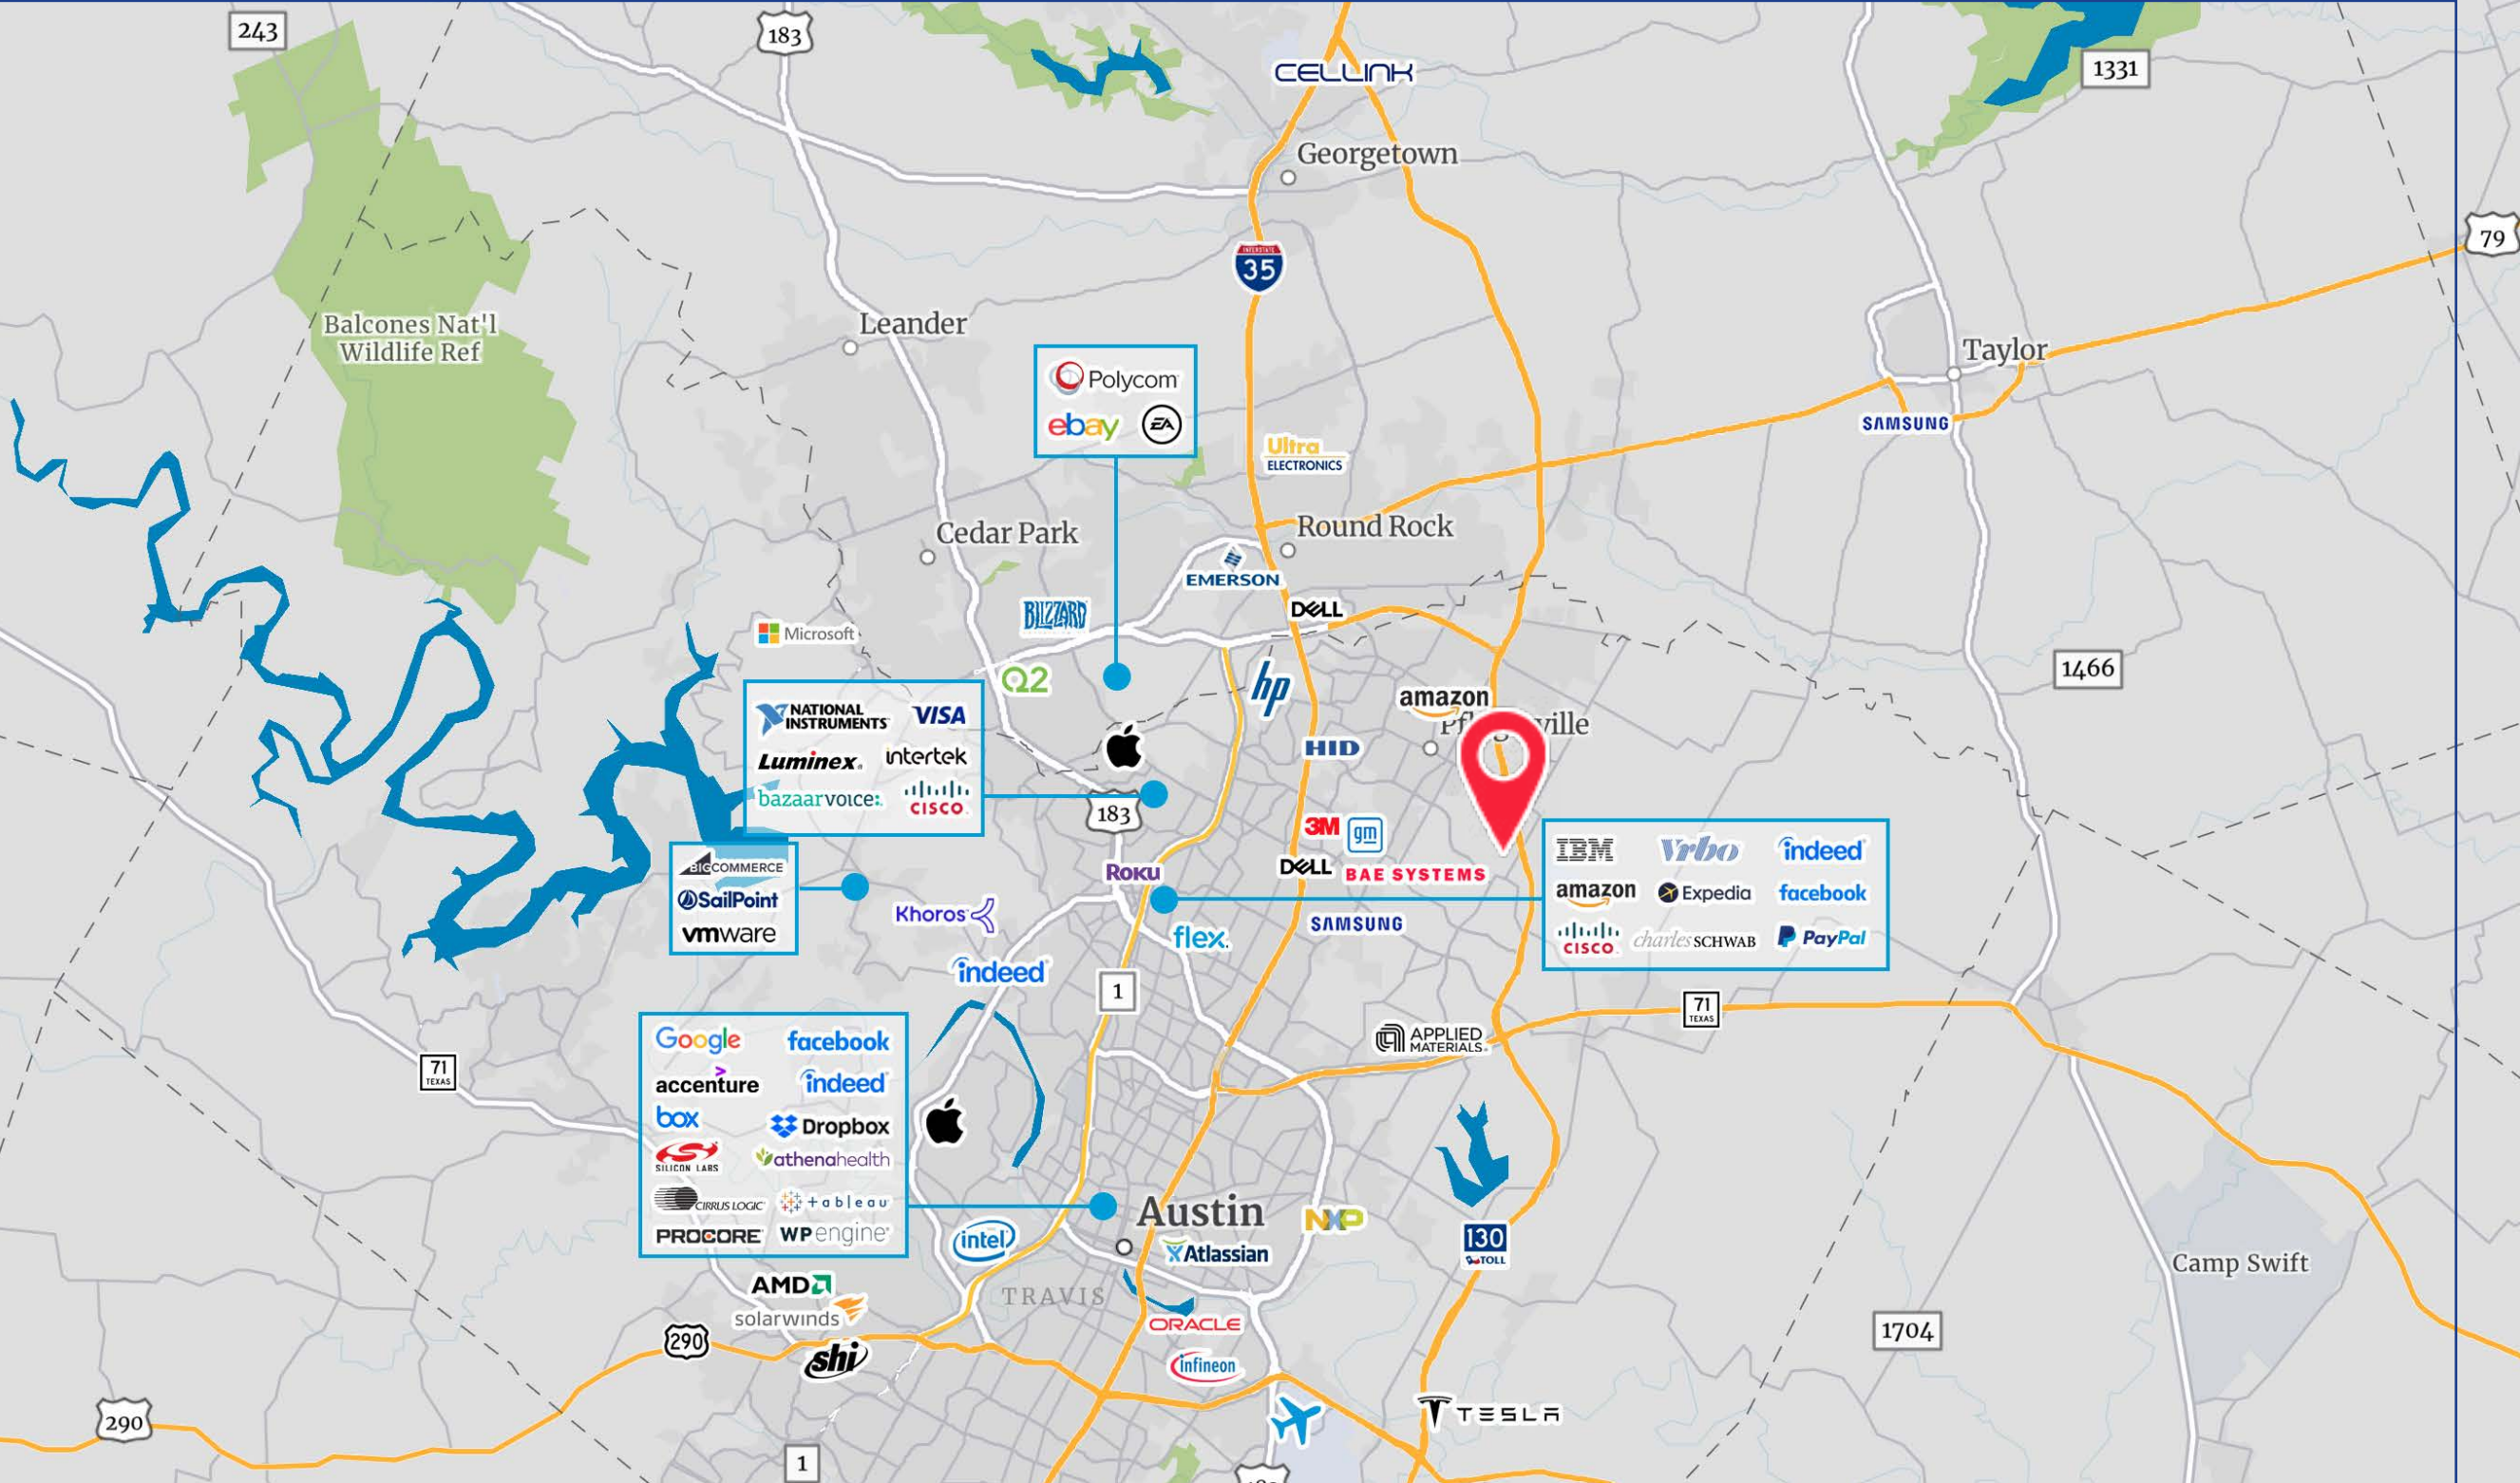

#1 Hottest U.S. Job Market

Austin topped the list of hottest US job markets for the second consecutive year, according to a Wall Street Journal ranking of new data collected by Moody’s Analytics. The list was created in conjunction with Moody’s Analytics and assessed data from 381 different metro areas. The cities were scored based on five metrics: unemployment rate, labor-force participation, job growth, labor-force growth, and wage growth. When broken down by metric, Austin ranked in the top five for its wage growth (5 percent), labor force participation (70.3 percent) and low unemployment (2.7 percent) pre-COVID-19. It also ranked in the top 10 for job growth (2.3 percent) and top 20 for labor force growth (1.6 percent).

Austin Industrial Overview

The Austin industrial sector ended the year strong and has continued to demonstrate remarkable resilience and growth in the face of an economic downturn. The fourth quarter saw 3.7 million square feet of new supply, contributing to a total annual delivery of 11.6 million square feet in 2023. While vacancy rates are climbing due to the volume of product being delivered, activity remains ample overall. A large portion of the transactions that took place in Q4 have been new tenants to the market, highlighting the large volume of interest from out-of-market tenants.

After a long period of rapid growth, Austin’s industrial construction pipeline is decreasing. On the heels of this, the volume of new starts are dropping significantly. Rental rates grew year over year from \$11.06 to \$13.41. We expect to see rates continue to climb while inflation remains high and new high-quality product continues to be delivered to the market.

Nationally, reshoring of manufacturing has gained momentum due to the federal installation of the CHIPS Act, and continues to be driven by global tensions and ongoing supply chain concerns. While warehouse and distribution facility development wanes, advanced manufacturing growth, especially in semiconductors and electric vehicle industries, will likely climb to unprecedented levels in 2024 and beyond. The presence of companies like Tesla and Samsung in Austin, along with the overall appeal of Texas’ pro-business climate continues to pique the interest of the sectors’ suppliers and adjacent industries from around the world.

Austin is poised to embrace the coming momentum from the semiconductor industry and the sustained momentum from the ever-growing technology scene. The city is endowed with a robust tech talent pool that can sustain rapid growth and evolution of cutting-edge technologies that will emerge as a direct result of these growing industries and funding from the **CHIPS Act**.

Market Graph

The industrial market experienced rapid growth with 11.6 million square feet of new product delivered year-to-date. While overall vacancy rates increased, positive absorption persisted. Austin’s industrial market achieved its third consecutive year of record-breaking absorption in 2023, totaling 1.2 million square feet in positive net absorption by the end of Q4.

Demographic Overview

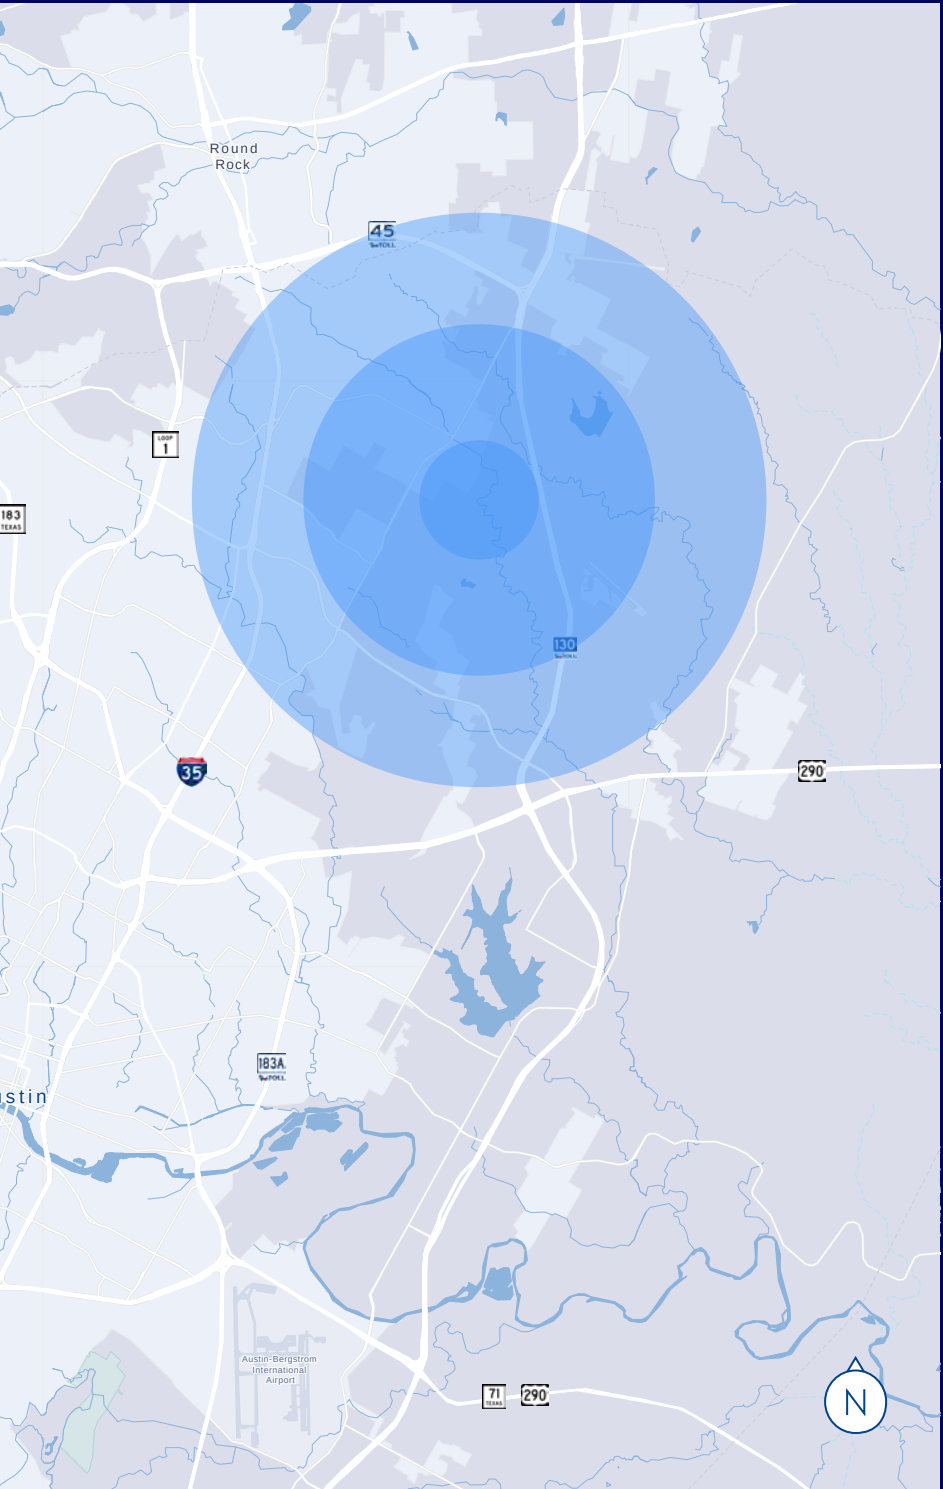

Demographics

Tapestry Segment (1 Mile): Urban Edge

Located throughout the South and West, most Urban Edge Families residents own their own homes, primarily single-family housing—out of the city, where housing is more affordable. Median household income is slightly below average (Index 91). The majority of households include younger married-couple families with children and, frequently, grandparents. Many residents are foreign born. Spending is focused more on the members of the household than the home. Entertainment includes multiple televisions, movie rentals, and video games at home or visits to theme parks and zoos. This market is connected and adept at accessing what they want from the internet.

Our Neighborhood

- Urban Edge Families residents are family-centric. Most are married couples with children of all ages or single parents; multi-generational homes are common (Index 201).
- Average household size is higher at 3.19 (Index 123).
- Residents tend to live farther out from urban centers—more affordable single-family homes and more elbow room.
- Tenure is slightly above average with 64% owner occupancy; primarily single-family homes with more mortgages (Index 114) and slightly higher monthly costs (Index 115).
- Three quarters of all housing were built 1970 or later.
- Many neighborhoods are located in the urban periphery of the largest metropolitan areas across the South and West.
- Most households have one or two vehicles available and a longer commute to work.
